

UC Irvine Internal Medicine Residency Training Program

DSR 2 Mini Lecture Outline

Lectures can be accessed here: <https://www.medicine.uci.edu/residency/minilecture.asp>

Or through the website: Department of Medicine > Residency Program > Resident Resources > Mini Lectures link at top of screen

Purpose: provide short, concise lectures on specific inpatient topics that can be delivered by an attending or resident to an inpatient ward team.

Format: PowerPoint Presentation

Length: No longer than 10 – 15 minutes

Lecture must include the following:

1. Start with an “**Objectives**” slide – no more than three points are recommended
2. Include at least one case vignette within the presentation
3. Avoid too many words on each slide
4. Flow diagrams/charts are a good way of presenting information concisely
5. End with a “**Summary**” slide of key, take home points
6. Include a “notes” section for others to deliver the presentation in the same manner

At this time we ask that you update one of the “old” lectures to fit the above criteria/format and make sure the material being presented is based on current guidelines/evidence. Requests to add a “new” lecture will be made on a case by case basis.
